Topic: Digital Photography with Dr. Tarun Argarwal
via T-Bone Speaks Podcast

1. What imaging software does our office use to incorporate images into the patient's chart?
2. As a new dentist/educator/speaker, what tool did Dr. Argarwal (T-Bone) use to get his start in this field?
3. What did (T-Bone) incorporate into the patient's visit to gain treatment acceptance? Why do you think he was able to gain more treatment acceptance that way?
4. T/F We have an intraoral camera in THIS office. Why or why not?
5. T/F We have an extraoral camera in THIS office. Why or why not?
6. Who is taking the digital images in T-Bone's office? When are they taking them?
7. Which photos are they taking on new patients?
8. When THIS office takes photos, who currently uploads photos?
9. T/F T-Bone also takes additional photos at recalls.
10. T/F T-Bone does simulations of potential smiles.
11. T/F This office does simulations of potential smiles.
12. What's the difference between simulations and smile design?
13. What MAJOR tool does this office have to show patients potential smile changes?

Let's go and practice taking photos!!
